

PURE EMU OIL

Triple Refined

Live a happier and healthier life with
Pure Emu Oil & Flaxseed Oil
vs. Fish Oil

What are essential fatty acids?

* Omega-3 is essential for proper development of nerves, eyes and brains in growing children. They protect against dying from a heart attack (cardiovascular). And they have been studied for their beneficial effect on inflammatory diseases such as arthritis, lupus and asthma.

* Omega-6 is a natural anti-inflammatory.

Omega-9 retunes your immune system and begins healing damaging conditions.

Flaxseed Oil is rich in Omega 3 essential fatty acids, magnesium, potassium, and fiber. Flaxseed Oil is also a good source of B vitamins, protein, and zinc. Several studies have shown that it can reduce pain, inflammation, and swelling of arthritis. It has also been found to lower cholesterol and triglyceride levels, and to help reduce the hardening effects of cholesterol on cell membranes.

Pure Emu Oil naturally contains Linolenic Acid (Omega 3), Linoleic Acid (Omega 6) and Oleic Acid (Omega 9). These essential fatty acids have proven beneficial in healing. Studies show that Emu Oil has both moisturizing and anti-inflammation properties.

The pure Emu Oil by itself has 22 different essential fatty acids in its natural form that includes Omega's 3, 6, & 9.

It is anti-bacterial and hypo-allergenic. Emu Oil is also hyper oxygenated which means it brings the oxygen to the surface of the skin, which is why it works so well for wound care and anti-aging. It also penetrates down through all 7 layers of skin and helps with new cell proliferation.

Fish can contain harmful methylmercury. Pregnant and breastfeeding women and young children are advised not to eat shark, swordfish, king mackerel or tile fish because they contain high levels of mercury.

Emu Oil has Omega 3, 6, & 9 essential fatty acids, fish oil does not!

Why would anyone use any thing else?

Multi-Omega Gel Capsules

“The HEART of Cardiovascular Natural Cardiovascular Risk Management”

The key to keeping cardiovascular disease (CVD) at bay is maintaining healthy arteries. We have come along way with natural, dietary supplements in forming a defense helping to manage blood components, namely cholesterol, and reinforcing vascular integrity.

Did you know that Heart Disease is America's number one killer? There are numerous diseases that affect the heart system and vital organs dependent on sufficient blood flow. Coronary heart disease is one of the major ailments. The top risk factors are the formation of plaques from hardening arteries. Fatty deposits are comprised of lipids, calcium, carbohydrates, proteins and fibrous tissue. These deposits start to attach themselves to the artery walls and steadily build up, becoming a primary contributor to arterial blockage.

You have heard of Low-Density Lipoprotein (LDL) and High-Density Lipoprotein (HDL) before. LDL transports cholesterol and triglycerides to the arteries, where they are released and vulnerable to oxidation. HDL carries cholesterol away from arteries and into the liver for removal. Multi-Omega Gel capsules contain essential fatty acids (Omega 3 and 6) which help with removal of bad fats, thus reducing overall cholesterol levels.

Dr. Robert Nicolosi, Director of the Center for Health and Disease Research at the University of Massachusetts-Lowell, has been conducting research to evaluate these claims. "Trials indicate that emu oil does have cholesterol lowering, anti-inflammatory and transdermal properties," reports Nicolosi.

The results of the trials were staggering! Emu oil reduced the total cholesterol over 30%. LDL (bad cholesterol) was reduced 25%. Over 100 million Americans are suffering from high cholesterol and the need for alternative natural supplements is a must. Emu Oil in an ingestible form may become a very attractive alternative for some consumers.

Multi-Omega answers this calling!

"Our research continues to study the many intriguing aspects of this oil. The most recent conclusions are very promising for millions of Americans," said Nicolosi.

We Have Combined Two Wonderful All Natural Oil's So You Can Have The Best Of Both Worlds In One Bottle.

Mo+ MUTIOMEGAS

plus - 1000mg

Get the best of both worlds with Multi-Omega Gel Caps. Multi-Omega Gel Caps offers a complete balance of Essential Fatty Acids by providing benefits from Emu Oil and Flax Seed Oil. Emu Oil contains all three fatty acids while dominating in Omega 6 and 9 where Flax Seed Oil dominates in Omega 3 and 6.

Multi-Omega will help ease aches and pains, lower cholesterol, raise energy levels, improves insulin sensitivity and counteracts the dreaded Syndrome X (high blood pressure, diabetes, fatigue, cardiovascular disease, weight gain and obesity).

Many test have been conducted on Omega 3 backing these studies up to the point where the FDA has acknowledged similar statements.

Expect Results!

The Australian Department of Health has classified **Emu oil as a pharmaceutical product** and has registered it in the Therapeutic Goods' Registry.
